Integrity Constraints

- Primary key / Unique Constraint
 Uniqueness of column values
 Identification of records
- ► Foreign key
 Relationships between tables
 Referential integrity, target must exist
- Check Constraint
 Restriction on column values
 Quantities of line items within orders must be greater than 0
- Not Null Constraint Must contain values, i.e. cannot be empty

Reasons for Null Values

- ► Information not provided Private telefon number
- ► Information not existing, yet Exmatriculation date exists only after Exmatriculation
- ► Column not suitable

 Table for person records with data for students and other persons, column MatrNo only applicable for student records
